PROFESSIONAL PROFILE

Frontend developer with 6+ years of experience building responsive, user-focused web applications. Specialized in creating intuitive interfaces with clean, scalable code and strong attention to detail. Experienced in component architecture, state management, and full-stack fundamentals. Always learning and growing—passionate about continuous improvement, staying current with modern development practices, and delivering exceptional user experiences through thoughtful, scalable solutions. I approach every project by first understanding the user deeply, then building solutions that actually work.

PROFESSIONAL EXPERIENCE

12/2018 – Present

Self-employed, Freelance Frontend Developer

- Developed and maintained responsive websites for 5+ clients, focusing on modern UI/UX principles
- Created custom React components for e-commerce platforms resulting in 25% improved user engagement
- Implemented mobile-first approach across all projects, ensuring seamless experience across devices
- Collaborated with designers to transform wireframes and mockups into functional interfaces
- Used Git for version control and project management to ensure efficient workflow

04/2018 – 11/2018

Improve Solution Corp., Software Developer

- Built interactive frontend features using HTML, CSS, and JavaScript that improved user experience
- Collaborated in implementing modern UI components that reduced page load time by 30%
- Gained experience working with PostgreSQL databases to support frontend data needs
- Participated in code reviews to maintain high code quality and consistent development practices

11/2017 – 03/2018

Ubit Consultants, C.A, Junior Software Developer

- Contributed to single-page application development using React and Angular that improved overall performance
- Implemented responsive designs for web applications ensuring cross-browser compatibility
- Developed unit tests to ensure code integrity, reducing production bugs by 15%
- Utilized Git for version control and code management in a collaborative environment

EDUCATION

10/2014 – 11/2018

Computer Engineering Studies, Universidad De Oriente

- Completed 90% of coursework toward Computer Engineering degree
- Specialized in software development and programming fundamentals
- Academic career interrupted due to international relocation
